

## Cytokinetics to Hold Annual Meeting of Stockholders

May 15, 2013 8:00 PM EDT

**South San Francisco, CA., May 15, 2013** - Cytokinetics, Incorporated (Nasdaq: [CYTK](#)) announced today that its Annual Meeting of Stockholders will be held on Tuesday, May 22, 2013 at 1:30 PM Pacific Time at the Embassy Suites Hotel, located at 250 Gateway Boulevard in South San Francisco, CA. Robert I. Blum, President and Chief Executive Officer, is scheduled to present an overview of Cytokinetics' performance.

Interested parties may access the live audio webcast of this presentation and replay by visiting the Investor Relations section of the Cytokinetics website at [www.cytokinetics.com](http://www.cytokinetics.com). The live conference call may also be accessed by dialing (866) 999-CYTK (2985) (United States and Canada) or (706) 679-3078 (international) and typing in the passcode 11891010. The webcast will be available via Cytokinetics' website for one week following the event. The replay of the audiocast will be available via telephone from May 22, 2013 at 2:30 PM Pacific Time until May 29, 2013 by dialing (855) 859-2056 (United States and Canada) or (404) 537-3406 (international) and typing in the passcode 11891010.

### About Cytokinetics

Cytokinetics is a clinical-stage biopharmaceutical company focused on the discovery and development of novel small molecule therapeutics that modulate muscle function for the potential treatment of serious diseases and medical conditions. Cytokinetics' lead drug candidate from its cardiac muscle contractility program, *omecamtiv mecarbil*, is in Phase II clinical development for the potential treatment of heart failure. Amgen Inc. holds an exclusive license worldwide (excluding Japan) to develop and commercialize *omecamtiv mecarbil* and related compounds, subject to Cytokinetics' specified development and commercialization participation rights. Cytokinetics is independently developing *tirasemtiv* and CK-2127107, both fast skeletal muscle activators, as potential treatments for diseases and medical conditions associated with aging, muscle wasting or neuromuscular dysfunction. *Tirasemtiv* is currently the subject of a Phase II clinical trials program and has been granted orphan drug designation and fast track status by the U.S. Food and Drug Administration and orphan medicinal product designation by the European Medicines Agency for the potential treatment of amyotrophic lateral sclerosis, a debilitating disease of neuromuscular impairment in which treatment with *tirasemtiv* produced potentially clinically relevant pharmacodynamic effects in Phase II trials. All of these drug candidates have arisen from Cytokinetics' muscle biology focused research activities and are directed towards the cytoskeleton. The cytoskeleton is a complex biological infrastructure that plays a fundamental role within every human cell. Additional information about Cytokinetics can be obtained at [www.cytokinetics.com](http://www.cytokinetics.com).

*This press release contains forward-looking statements for purposes of the Private Securities Litigation Reform Act of 1995 (the "Act"). Cytokinetics disclaims any intent or obligation to update these forward-looking statements, and claims the protection of the Act's safe harbor for forward-looking statements. Examples of such statements include, but are not limited to, statements relating to planned presentations, and the properties and potential benefits of Cytokinetics' drug candidates and potential drug candidates. Such statements are based on management's current expectations, but actual results may differ materially due to various risks and uncertainties, including, but not limited to, potential difficulties or delays in the development, testing, regulatory approval and production of Cytokinetics' drug candidates and potential drug candidates that could slow or prevent clinical development or product approval, including risks that current and past results of clinical trials or preclinical studies may not be indicative of future clinical trials results and that Cytokinetics' drug candidates and potential drug candidates may have unexpected adverse side effects or inadequate therapeutic efficacy. For further information regarding these and other risks related to Cytokinetics' business, investors should consult Cytokinetics' filings with the Securities and Exchange Commission.*
